Education

University of Illinois Urbana-Champaign **August 2026**
Non-degree coursework: MATH 257, Linear Algebra with Computational Applications (A; 3 credits).

Purdue University, West Lafayette, IN **May 2025**
B.S. in Business Analytics and Information Management | Minor in Economics
Cumulative GPA: 3.36/4.00 | Semester Honors: Fall 2023, Fall 2024, Spring 2025
Final four semesters: GPA 3.63/4.00 (calculated; Fall 2023 - Spring 2025, 58 credits).

Selected Coursework
Mathematics and statistics: Applied Calculus I (A+); Econometrics (A).

Computing: Data Engineering in Python (A-); Python for Business (A).

Analytics: Data Mining (A+); Machine Learning for Business (A-); Data Visualization (A-).

Professional Experience

Munich Re Specialty North America
Underwriting Assistant *Aug 2025 - Present*

- Support underwriters with exposure data review, endorsement premium calculations, and policy documentation; prepare reports and coordinate with brokers.
- Developed and shared a natural-language workflow assistant, checking outputs against alternative calculations and incorporating human review.
- Centralized system issue tracking with a shared reporting format and led a training session for 10+ underwriting assistants; proposed changes incorporated into system updates.

Self-employed
Freelance Analyst *Nov 2022 - Aug 2025*

- Delivered 30+ research and analytics projects for clients across freelance platforms, using Python and Power BI for analysis and reporting.
- Analyzed data from large Excel workbooks and prepared concise analytical reports, presenting key findings in a format clients could readily interpret and use.

Research and Competitions

Kaggle
Competitions Expert | 3 Silver Medals *2026*

- Earned a solo silver medal in Biohub - Cell Tracking During Development, placing 51st of 3,947 teams (top 1.3%) on the final private leaderboard.
- Placed 76th of 10,148 teams (top 0.8%) in Kaggriculture, an agent-based farming competition, earning a solo silver medal.
- Published a beginner guide to Kaggriculture scoring and submission strategy that received 95 community votes.

Purdue University
Selected Academic Projects *2024 - 2025*

- Compared machine learning models to classify grief stages from TAPS survey responses for the Data4Good Case Competition. The project examined how analytics could inform support for bereaved military families.
- Documented model development and iterative experiments in a research paper and co-presented the study at Purdue's Fall Undergraduate Research Expo (Nov 2024).
